

Lab and video makeup report

If you miss a day that we do a lab or a video it is very difficult to come in and make these up. As an alternative you will write a report for the lab or video you missed. This report will go on the even numbered side of your notebook for the day you missed. You will still be expected to do the left side as it is explained on my website. This report only makes up the even numbered page. Below is a list of what needs to be included in your report. If you are missing any of these things you will not receive full points.

- Write the Lab or video this report is making up.
- Research the topic of the lab or video you missed and write at least 8 sentences explaining the topic.
- Cite your source of where you got the information.
- Write two sentences explaining two new things you learned from this research. (One sentence for each new thing you learned.)
- Write a test type question using the information you learned.
